Supervisors State Department of Education Met With Teachers At Pamplin Elementary

Mrs. Winnifred Mahony, Assistant Supervisor, State Department of Education, and Mr. Bob Mills, Assistant Supervisor, State Department of Education, met with the staff at Pamplin Elementary School on Tuesday morning, March 18th, to work in the area of Language Arts.

Shown above, left to right, are Mrs. Barbara Mrs. Addie Spencer, Mrs. Sadie Mitchell, Mrs. Barbara Shelton, Mr. Mills, Barbara Waddell, principal at P.E.S., Nancy Coleman and Mrs. Nancy Peters.

After visiting the classrooms during the day, Mrs. Mahony met with groups of teachers to suggest and share creative ideas that might be incorporated into a reading lesson. Her ideas included use of the tape recorder in reading, through preparing original tapes, various ideas for the use of poetry and using children's natural curiosity for learning about people of other lands. One main point brought before teachers was that the teacher's enthusiasm is the most important element in teaching reading.

Mrs. Barbara Waddell, principal, who participated in the annual Longwood Reading Institute last fall was invited to write an article concerning the changes in the physical facility and the instructional program at Pamplin Elementary School. The article will appear in the Virginia State Reading Association (VSRA) publication to be distributed at the VSRA Conference this week end at Norfolk.

USDA ANNOUNCES INCREASE IN COMMODITY LOAN INTEREST RATE, SERVICE FEE

The U.S. Department of Agriculture (USDA) today announced an increase in the interest rate on commodity loans to cotton and grain producers effective with 1974 crop year loans. The increase, from 5.5 to 7.25 percent per annum, computed on a daily basis, will more nearly reflect the borrowing cost of money to the Commodity Credit Corporation (CCC).

In making the announcement the Department said that every six months the CCC will review interest charges for the CCC Loan Program with the goal of keeping the rate of interest charged to producers in line with CCC borrowing cost from the U.S. Treasury.

Also announced today is an increase in warehouse and farm storage loan service fees to reflect additional costs in processing commodity loans on grains and similarly handled commodities. Warehouse storage loan service fees for grains are increased from $4 to $6 per loan plus $1 for each additional warehouse receipt over one. Service fees on farm stored loans for grain loans are increased from $8 to $10 per loan plus $1 for each additional bin over one. These increases will also be effective with 1974 crop year loans.

The availability of current crop year loans to producers and producer cooperatives is continued as in past years. The loans provide interim financing for producers to assist them in orderly marketing of their crops.

Commodity loan operations have been carried out by CCC since 1933. During the past fiscal year (1972-73) a total of 1,811,687 loans were made to producers, individually and through producer cooperatives, for a total value of $1,423,614,136.
